Summary

Data engineer with six years of experience building reliable batch pipelines and reporting databases in Python and SQL.

Experience

Data Engineer, Sample Analytics Co.
April 2020 - Present
- Built Airflow pipelines that load daily data into a PostgreSQL warehouse.
- Modeled reporting tables with dbt and added tests for every critical metric.
- Cut nightly run time by 40% through query tuning and partitioning.

Junior Analyst, Example Retail Ltd.
July 2017 - March 2020
- Wrote SQL reports for the sales team.
- Automated weekly exports with Python.
- Documented data sources for new staff.
